

# Reinsurance Professional P&C 3

This course is for insurance professionals involved in the placement of your company's reinsurance programme in Property and Casualty. In your exchanges with reinsurers, the insights from this training will prove invaluable.

By looking into and working on various case studies, together with the insights you will gain into the newly effective IFRS 17 standard and its implications to your reinsurance programme, you will be able to identify which reinsurance solutions best meet your company's needs. The course covers the whole reinsurance spectrum, enhancing your knowledge of the industry.

## Learning goals

- Analyse the impact of important contractual clauses on claims.
- Detect challenges in the changing risk landscape, secondary perils, and Nat Cat risk premium calculations using probabilistic approaches.
- Allocate premiums and claims in various accounting systems.
- Differentiate between various triggers on an insurance policy, the importance of reserving for bodily injury and latent claims, and different calculation methods.
- Recognise your company's reinsurance requirements, comparing reinsurance solutions, as well as data-driven opportunities for your company.

## Audience

- Experience of placing a reinsurance programme and calculation of premiums, costs and losses under the different types of reinsurance contracts.
- Familiarity with reinsurance clauses that may have an impact on claims.
- Understanding of functions and interactions of quota share, surplus, working and catastrophe excess of loss treaties.
- Awareness of your company's needs with respect to reinsurance and other solutions.
- Solid underwriting know-how.

## Pre-requisite

In this training we will build on fundamental knowledge which is covered in the Reinsurance Professional P&C 1 and 2 courses.

Please make sure that you have the necessary experience to attend this course. If you are uncertain, please get in touch with us.
